To Whom It May Concern:

I have heard that the slaughter of downed cattle is a practice that is being allowed to continue in this country. I am appalled that the FDA has not already banned such acts. With the risks of Mad Cow Disease and other serious illnesses I would think there would be no hesitation in eliminating such a practice, but such is not the case. I urge you to make it the case now. I hope that you will take this into consideration and decide to ban the slaughter of downed cattle. It is unhealthy and immoral. Thank you.

Sincerely,  
Lindsey Nielsen
